

JavaScript Developer (React)

The JavaScript Developer is responsible for translating business requirements into specific systems, applications or process designs for large, complex, and leading-edge web solutions.

This is a remote role on contract basis (B2B).

Key Responsibilities

- Serve as a team development member across one or more projects
- Estimate work in support of sprint and release planning as well as long-range road mapping
- Ensure on-time and high-quality product delivery
- Develop and execute unit tests and support functional, non-functional testing
- Support new products through deployment lifecycle

Qualifications — Required

- Bachelor's Degree in Computer Science or Engineering
- 3+ years of hands-on experience in web development/services development across the entire development lifecycle — concept, design, built, test, deploy, support
- 3+ years of experience with frontend web technologies and frameworks (JavaScript, Angular, Vue, React, etc.) — React experience strongly preferred
- Understanding of event-driven systems
- Extensive experience in developing web applications using HTML/HTML5, XML, CSS/CSS3, SASS, LESS, JavaScript, React JS, JSON, Node.js, Bootstrap
- Demonstrated experience developing single-page applications (SPAs)
- Experience customizing CSS frameworks like Bootstrap using CSS pre-processors
- Strong working knowledge of web protocols and standards (HTTP, HTML5/XHTML/XHTML-MP, CSS3, web forms, XML, XML parsers)
- Experience using version control tools such as Git
- Strong analytical and problem-solving skills
- Excellent communication and interpersonal skills
- Well organized and goal oriented with proven ability to manage multiple priorities and deliverables

Qualifications — Preferred

- Master's Degree in Computer Science/Information Systems is a plus

- Experience with Microsoft Azure is a plus
- Experience with Azure DevOps is a plus
- Transport/Maritime industry experience is a plus
